

DataShielder HSM from FullSecure®

Andorra wins the Fortress 2023 Cybersecurity award

Escaldes-Engordany, Andorra—September 25, 2023—The Business Intelligence Group announced that **DataShielder HSM** from FullSecure has won the Fortress 2023 Cybersecurity Award in the “**Encryption**” category. This industry awards program aimed to identify and reward the world's leading companies and products working to protect our data and electronic assets in the face of a growing threat from hackers.

DataShielder HSM from FullSecure® is an innovative solution that allows you to manage and generate different types of tokens (usernames, passwords, certificates, encryption keys, etc.) on any type of data storage media, whether connected or not. DataShielder HSM uses EviCore HSM OpenPGP and EviCore NFC HSM technologies developed by Freemindtronic, an Andorran company leader in NFC HSM technologies. These technologies offer a high level of security and performance, by encrypting, signing and authenticating data with keys stored in secure contactless modules.

DataShielder HSM is designed to transform any media into a HSM (Hardware Security Module), serverless, databaseless, completely anonymous, untraceable and undetectable.

DataShielder HSM is a comprehensive ecosystem that addresses many security and cybersecurity needs. DataShielder HSM also integrates EviSign technology developed by Freemindtronic, which allows documents to be electronically signed with legally recognized value. EviSign uses the OpenPGP protocol to guarantee the integrity, authenticity and non-repudiation of signatures. EviSign is compatible with all document formats (PDF, Word, Excel, pictures, etc.) and can be used with any NFC reader or smartphone.

DataShielder HSM was presented in a Dual-Use version (civil and military) in June 2022 at [Coges Eurosatory](#), the international defense and security exhibition in Paris. This version allows DataShielder HSM to be used for both civil and military applications, offering a level of protection adapted to each context. The Dual-Use version of DataShielder HSM will be available in civilian version by the end of 2023, to meet the growing demand from individuals and professionals keen to protect their sensitive data.

“We are very proud that FullSecure **DataShielder HSM** is recognized with the 2023 Fortress Cybersecurity Award,” said Christine Bernard, Director of FullSecure. “Our solution provides an innovative and adapted response to current and future cybersecurity challenges. We thank the Business Intelligence Group for this distinction, as well as our customers and partners for their trust and support.”

“We are also very happy to be the first Andorran company to have applied for the Fortress Cyber Security Award, created in 2018 by the Business Intelligence Group. The Business Intelligence Group is an organization that recognizes true talent and superior performance in the business world. Its Fortress Cyber Security Award aims to identify and recognize the world's leading companies and products. »

To know more about technologies embedded in **DataShielder HSM**, you can read the articles on [EviCore HSM OpenPGP](#), [EviSign HSM](#), [EviCypher HSM](#) et [EviKey NFC HSM](#) compatible with **DataShielder HSM**.

About Business Intelligence Group www.bintelligence.com

The Business Intelligence Group was founded with the mission to recognize true talent and superior performance in the business world. Unlike other industry awards programs, these programs are judged by business executives with experience and knowledge. The organization's proprietary and unique rating system selectively measures performance across multiple business areas and rewards companies whose achievements stand out from their peers.
