

Freemindtronic

TUTORIAL SEEDNFC

Creation of cryptocurrency wallets

- ✓ - Three models available: 4, 50 or 100* records
- ✓ - Two formats available: credit card format or Tag
- ✓ - An application for Android phones: Freemindtronic

(*) 1 Free INPUTSTICK
with the 100- version

You will need...

An NFC Android phone
with the "Freemindtronic"
app from Play Store

A SeedNFC device in card
or Tag format

Your SeedNFC device

Each card (or Tag) comes with a unique pairing key (QR code).

This QR code is found on the white PVC card. You must pair your card with your phone to use it.

Store it in a safe place because you will need the pairing key if you change phones. If you lose the QR code, we will not be able to provide it to you.

About the NFC connection

Find the location of the NFC antenna on your smartphone.

NFC antennas on smartphones are generally located on the upper back part, under the cameras. However, they can be in other places depending on the phone model.

If you are having difficulty using the NFC card with your phone, try placing the card in different positions or consult your phone's technical specifications to locate the NFC antenna.

Operation

A phone + an NFC device

No connector, no battery

Contactless communication

The Freemindtronic App installed on an NFC
Android phone and an **NFC device**

You can create cryptocurrency wallets directly
from your phone and save them in the NFC
device.

You can share encrypted private keys with
RSA 4096 by any method available on your
phone.

Table of contents

- Pair the card (or Tag) with your phone
- - Description of the Application home page
- - Creation of a cryptocurrency wallet
- - Access to saved information

Consult the advanced settings tutorial available for download at www.freemindtronic.com.

Principle of the Administrator password

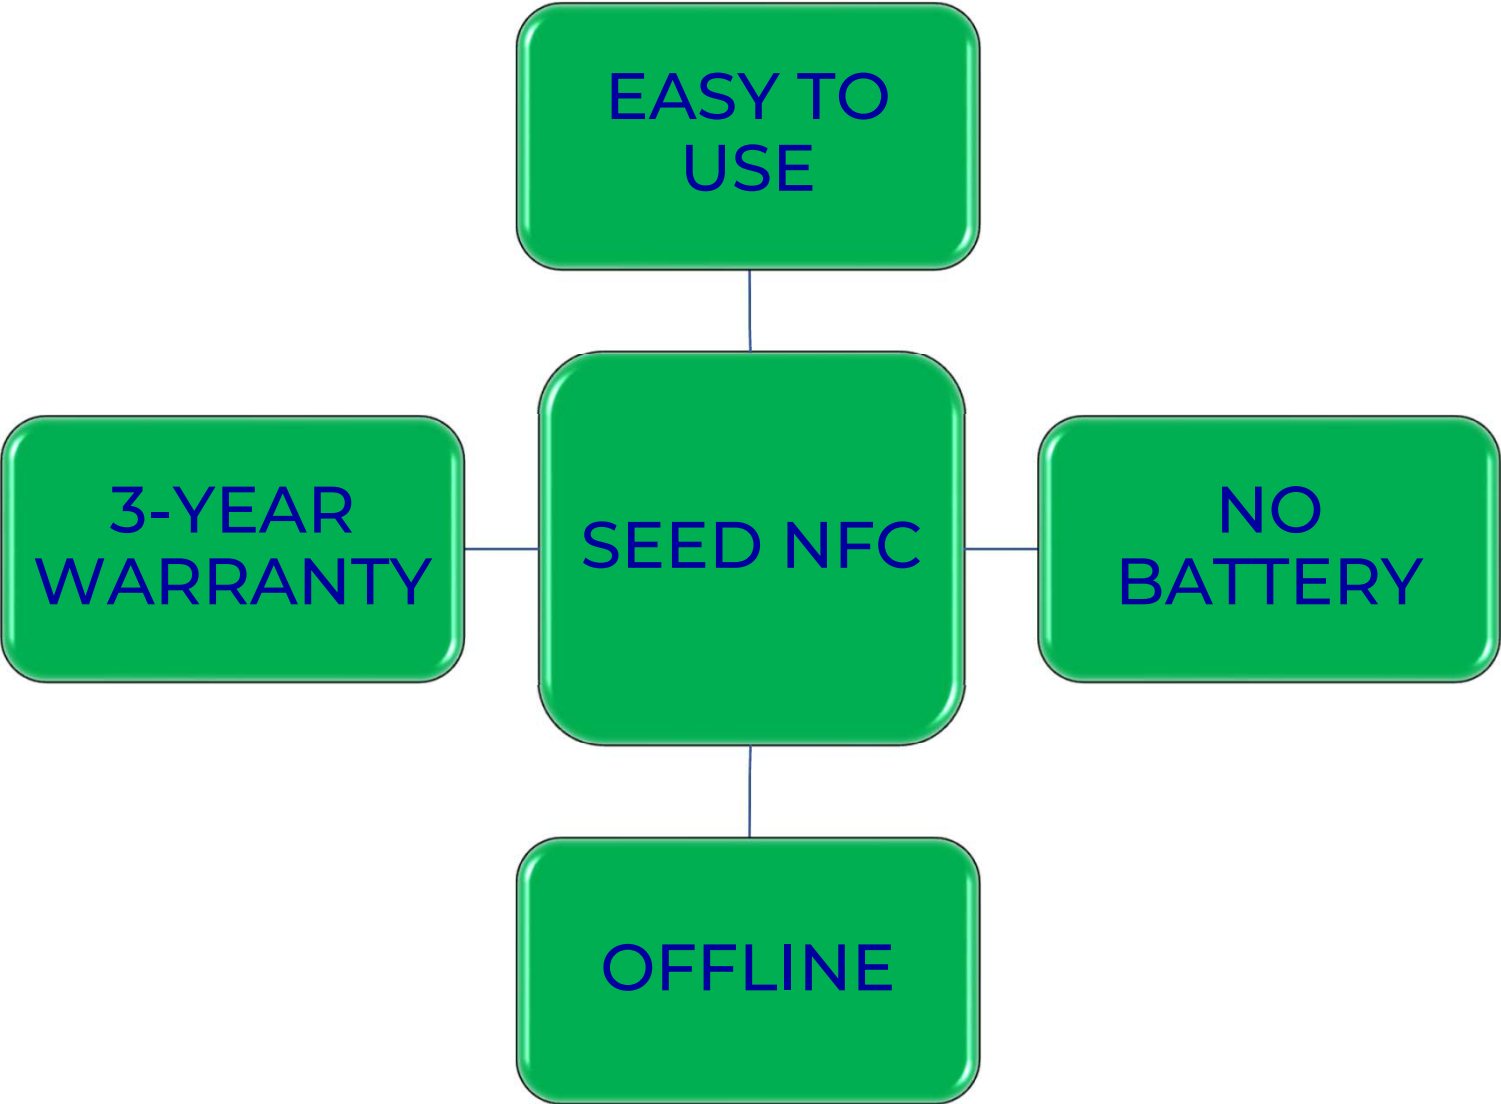

Access to Administrator settings is protected by a password. The person who sets it is the only one who knows it.

- ✓ The Administrator password allows access to advanced settings.
- ✓ - Once set, this password must be kept safe. We cannot assist if it is forgotten.
- ✓ - Upon first use, read the on-screen information message carefully.
- ✓ - It is not mandatory to set this password to use the App features.

Consult the advanced settings tutorial available for download at www.freemindtronic.com.
